DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: the status of the application 09/395,708 should be updated.

Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 17, 22-23 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 17 and 22-23 of copending Application No. 10/034,593. The application '593 discloses a high-pressure gas source and a fluid source being mixed together in a mixer to form a high-pressure fluid source.

This is a provisional obviousness-type double patenting rejection.

Allowable Subject Matter

4. Claims 18-21 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter:

Takakusaki et al (4,850,850) discloses an apparatus for preparing heat-set plastic hollow vessel, comprising a blow mold having a mold cavity (1), a high pressure fluid source (80, 81), a heater to heat some of the high pressure fluid (85, 86), a blow core (69) engageable with the preform and coupled to the high pressure source and having an exhaust (71) to exhaust fluid from the interior of the preform, a controlling valves (81, 83, 90) for controlling the flow rate of the fluid.

Takakusaki et al, however, fails to disclose a separate high-pressure fluid source from the high temperature fluid source. When the fluid sources are provided separately as disclosed by the current claims, the pressure and the temperature of the preform could be more controllable because the pressure and the temperature could be controlled independently from each other.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
